Tree-planting Campaign

Tree Day — June 15, 2010

In order to celebrate Tree Day, students from the Quepos Technical High School, children from the Tucanes Ecological Club from the Portalón Elementary School and Portasol staff members participated in the tree-planting campaign.

We contributed to Earth's 'lungs' by planting more than 300 trees. We are proud of our efforts because they benefit everyone and we should conserve the environment.

ENVIRONMENTAL CAMPAIGN

Thursdays and Fridays of the first week of each month we collect recyclable material.

Fauna at Portasol

Scientific Name: Dendrobates auratus

This is one of the large variety of species that can be found in the community of Portasol. Specimens can be seen in the forest, on the trails, among the stones, along the streams and under the plants.

Hoisting of the Green Flag at Portasol

June 15, 2010

The Costa Rican Water and Sewer Company (AyA) and the Seal of Sanitary Quality Program recognize Portasol S.A as the first Real Estate Developer to sustainably provide drinking water in harmony with the environment. Therefore, we were awarded the one-star green flag and special guests accompanied us when it was hoisted. There are photos of the event on our Facebook page.
