

## What's new in the project

“La Garita”, this is Portasol’s New Entrance. The access to Portasol will be controlled, this will provide security to the project. Owners, collaborators and visitors will be identified.

A Sample of Portasol’s Flora

## Area Important News

- The Costa Rican government signed off a contract with a private company which already started to build a provisional Bailey bridge for the Portalón River. We expect it to be finished in four months.
- Hernán Solís and Co. was awarded with the project of the Southern Coastal Highway. They will be in charge of building up the road between Quepos and Dominical

## Project Managing Actions

**Portasol participated in the XXVIII Casin Seminar in Geneve, the topic was: Fostering Entrepreneurship.**

Together with 35 people of 32 different countries, Guillermo Piedra, Portasol CEO, attended lectures, case studies, simulations, all as part of a very rich learning experience in Geneve. It was a great opportunity to establish relationships with organizations interested in fostering small businesses. This time was priceless for us as a company not only for the experience but for our Private Biological Preserve. It also will bring good for the residents of Portalón, community that constantly gets our support and services.

## Corporate Social Responsibility

**May, June and July: Months of knowledge at Portalón**

Portasol is providing several courses and encouraging Portalón’s citizens to study and learn:

Some topics are:

- Handmade rustic signs
- Maintenance of green areas and gardens
- Stretch and warming up before starting an exercise program
- Managing weight properly
- Small businesses basic course
- Forest care taking
- Flat feet and back caring tips

... Be part of this unique encounter!

## Weather

**Rainy season started!  
Not so bad for the moment.**

**Scatted showers during the day, mainly afternoons. Gorgeous sunny mornings.**

**It is interesting to be a witness of the presence of rain at the forest knowing that the weather is different at the lowest part of Portasol and even more different down in Portalón. Check the micro climates.**

**These Days !!!**
